KERN MAP ELECTRONIC HANDLE DYNAMOMETER (40, 80, 130 KG)

Ref. EKMAP03

Description

• As part of post-accident rehabilitation, this device allows nursing staff to monitor and maintain the patient's physical fitness in a supervised manner•
Real-time mode: directly displays the real force•

Peak/max mode: displays the maximum force of a handshake• Average mode:

calculates the average force of two handshakes

• Counting mode: counts the number of clamping movements that exceed a predefined limit value•

Integrated AUTO-OFF function after one minute to save batteries•

Interchangeable springs allow you to quickly change the resistance (additional spring sets for 20 kg and 40 kg supplied)

• The different resistance levels of the springs make it possible to use this handle dynamometer in a targeted manner with different patient groups: children, the elderly, athletes in rehabilitation, etc... •

Safe and easy handling thanks to non-slip rubber handles

• Conversion of units possible between kg and lb

• Delivered in a sturdy case for simple and safe transport and for storing spring sets (dim. Case (W x D x H) 350 x 265 x 85mm)•

LCD screen, height of numbers 12 cm•

1 CR 2450 battery included (service life approx. 53 h)

• Net weight 0.3 kg
